NATURALIZATION BRANCH

During the fiscal year ended March 31, 1930, 11,171 certificates of naturalization were issued under the provisions of the Naturalization Act, Chapter 138, R.S.C., 1927, comprising 10,404 to aliens, 750 to persons who were naturalized as British subjects in Canada under the Naturalization Act, chapter 77, R.S.C., 1906, 11 to persons of Canadian birth who had taken out United States citizenship and desired to be repatriated, and 6 to minors.

The grant of the certificates mentioned in the preceding paragraph conferred naturalization upon 21,221 persons, this being due to the fact that the names of wives and minor children were included in the certificates.

It is worthy of note that during the fiscal year 1929-30, there was, as compared with the previous fiscal year, an increase of 3,827 in the number of certificates issued and 8,122 in the number of persons naturalized. It is considered that these increases have established a record since the present system of naturalization came into force.

There were issued, in the same period, 113 copies of certificates granted under the old Naturalization Act, chapter 77, R.S.C., 1906, and 227 copies of certificates granted under the Naturalization Act, chapter 138, R.S.C., 1927.

Twenty-eight certificates were revoked and cancelled by the Governor in Council during the fiscal year, being an increase of 1 as compared with the previous year.

A large amount of miscellaneous work was performed, such as furnishing the consular representatives of six foreign governments with monthly lists of their nationals who were naturalized in Canada during the fiscal year. Correspondence was conducted throughout the year with over 375 clerks of courts throughout Canada, and semi-annual returns of naturalization applications were received from each of these. A considerable amount of time was expended in comparing certificates, reports, etc. All questions and problems relating to nationality and naturalization arising in the administration of the various departments of the public service are referred to this branch for solution. Over 5,000 of such questions were dealt with during the year at the request of the departments and of the public in general. The enactment by several of the provinces of Old Age Pensions Acts has resulted in a very considerable number of inquiries regarding the naturalization of applicants for pension.

The staff of the branch is called upon to translate into French the annual report of the department.

For purposes of ready reference the statistical portion of the report of the branch which follows is arranged alphabetically in three separate schedules:—

Schedule I shows under the heading of "Country of Origin" the number of certificates issued and the number of persons naturalized during the fiscal year 1929-30.

Schedule II shows, in alphabetical order, the name, former nationality, date of oath of allegiance, date of certificate, occupation, present residence and certificate number of persons naturalized under the Naturalization Act, chapter 138, R.S.C., 1927, as registered in the Branch during the fiscal year.

Schedule III shows, in alphabetical order, the name, place of birth, date of certificate, date of oath of allegiance, occupation, residence, date of revocation and certificate number, if any, of persons whose certificates of naturalization were revoked by the Governor in Council under the provisions of the Naturalization Act, chapter 138, R.S.C. 1927, during the fiscal year.

OF THE

COMMISSIONER OF PATENTS

FOR THE

Fiscal Year ended March 31, 1930

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1930

*To His Excellency the Right Honourable Viscount Willingdon, G.C.S.I.,
G.C.M.G., G.C.I.E., G.B.E., Governor General and Commander in Chief
of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the report of the Commissioner of Patents for the fiscal year ended March 31, 1930.

All of which is respectfully submitted.

C. H. CAHAN,
Secretary of State of Canada.

OTTAWA, September 1, 1930.

ANNUAL REPORT OF THE COMMISSIONER OF PATENTS

The Hon. C. H. CAHAN, M.P.,
Secretary of State of Canada.

SIR,—In pursuance of the requirements of the 60th section of the Patent Act, chapter 150, R.S.C., 1927, I have the honour to report as follows upon the proceedings in the fiscal year ended March 31, 1930.

GENERAL BUSINESS

The amount of business transacted by the office was greater than any previous year. The transactions affecting patents, trade marks, copyrights, designs and timber marks amounted to 71,387, as compared with 63,592 in 1929. This was 7,795, or over 12 per cent more than the preceding twelve months.

Applications for patents totalled 14,288. This is 1,226, or over 9 per cent more than last year, and is the greatest number of patent applications filed in any year except 1925. In that year the increase in the number of applications was due to special provisions in the new Patent Act of 1923. Of the total number of applications 1,774 claimed priority of date under the International Convention for the Protection of Industrial Property as provided for by subsection 2 of section 8 of the Patent Act. This is an increment of 589, or nearly 50 per cent over 1929. Applications allowed by the examining corps totalled 11,793, an increase of 1,103, or over 10 per cent. There were 6,925 reports by examiners, an increase of 782 over last year or over 12 per cent. Ten thousand, four hundred and one patents for invention were issued. This is 1,066 more than 1929 and is an increase of over 11 per cent. Renewal fee certificates were issued on 149 patents. This is a decrease of 255, or nearly 63 per cent. Fifteen of these renewals were accepted under section 47 of the Patent Act. The registration of assignments was greater than in any previous year and the deeds recorded numbered 9,505, an increase of 1,278, or nearly 16 per cent. Caveat applications and grants amounted to 389 and 363 respectively. This is 11 applications and 29 grants more than last year. Orders for 7,158 certified copies of patent specifications and drawings were completed. This is 400 more than last year, or nearly 6 per cent. Twenty-six abandoned applications were reinstated under rule 11. Under subsection 3 of section 43 of the Patent Act 187 forfeited applications were restored and 15 patents which had become void for non-payment of renewal fees were revived under section 47 of the Patent Act. Nine hundred and sixty-three allowed applications for patents were forfeited for non-payment of the final fee.

Transactions relating to patents totalled 61,193, an increase of 5,646, or over 10 per cent over the preceding year.

Copyright registrations numbered 4,072. This is 1,029 more than last year and is an increase of nearly 34 per cent. Registrations of trade marks were 3,143, an increase of 827, or nearly 36 per cent. Two hundred and three trade marks were renewed. There were 408, or 71 more industrial designs

granted. This is an increase of over 21 per cent on the previous year. Seventy-two industrial designs were renewed. Timber mark registrations were 12, the same as last year. The assignments of copyright, trade marks, designs and timber marks totalled 2,282, an increase of 227, or over 11 per cent.

The total registrations relating to copyright, trade marks, designs and timber marks were 10,192. This is an increase of 2,147, or nearly 27 per cent on the previous twelve months.

A statement of the transactions of the office is given in appendix A and comparative statements of the Patent Branch and the Copyright and Trade Mark Branch since 1872 are given in appendices B and C respectively.

RECEIPTS AND EXPENDITURES

The total amount of fees was greater than any previous year. The net receipts amounted to \$574,918.26, an increase of \$44,679.32 over last year.

The total expenditure amounted to \$235,906.83, an increase of \$17,283.28 over the preceding year. The increase was about evenly distributed in the cost of civil government, printing the Patent Office Record and contingencies.

The surplus of receipts over expenditure was \$339,011.43.

The receipts from the Patent Branch were \$478,326.71, an increase of \$43,828.80. In this branch of the office the increased fees were mainly from applications filed, but there were also increases in the recordation fees for assignments, filing fees for caveats, Patent Office Record subscriptions and from sales of certified copies. There were slight decreases in the receipts for the restoration, reinstatement and revival of patents.

In the Copyright and Trade Mark Branch the fees amounted to \$96,591.55, an increase of \$850.52. More revenue was received from copyrights, designs and sale of copies than the preceding year but there was a decrease in the amount for the registration of trademarks.

A statement of receipts and expenditure for the last ten years is given in appendix D. Detailed statements of receipts for the same period for the Patent Branch and the Copyright and Trade Mark Branch are given in appendices E and F respectively.

RESIDENCE OF INVENTORS

The country of residence of inventors for the patents issued is given in appendix G. Applicants residing in Canada numbered 1,169, or over 11 per cent of the total. This is a decrease of 2 per cent from last year. Residents of the United Kingdom and the British dominions, colonies and protectorates applied for 1,089, or over 10 per cent of the issue. This is the same percentage as last year. Of the total number of patents issued 6,586 were applied for by residents of the United States. This is 63 per cent of the whole issue and is the same percentage as the preceding year. The remaining 1,557 patents, or nearly 15 per cent of the issue, came from residents in twenty-eight other countries and is an increase of 2 per cent over the previous twelve months.

"PATENT RECORD" AND EXCHANGE OF PUBLICATIONS

The official journal of the office, the Canadian Patent Office Record and Register of Copyrights and Trade Marks was issued each Tuesday. This corresponds with the date of grant of patents. Publication is made in each issue of the principal drawing and claims of patents, notices of hearings and other actions under the Patent Act, abridgments of trade marks and designs and lists of copyrights and assignments registered during the week. In addition to sales, free distribution was made to ninety-five government, university and public libraries in Canada, to sixty-eight in Great Britain and its dominions and colonies, to forty-four in the United States and to twenty-six other foreign libraries, consular and trade commissioners' offices.

The official journals and reports on patents, trade marks and designs were received from Great Britain, Australia, New Zealand, India, South Africa, France, United States, Belgium, Cuba, Italy, Japan, Mexico, Norway, Switzerland and the Union of Socialist Soviet Republics in exchange for the Record. The office also received the complete specifications and abridgments of British patents and the printed copies of patents of Australia, France, Italy, United States and the Union of Socialist Soviet Republics.

The exchange of the Record for about fifty technical and scientific periodicals was continued.

PATENT OFFICE LIBRARY

The Patent Office library, containing the bound volumes of British patents and abridged specifications from 1617, the United States patents from 1872, the earlier French patents and the recent Australian and Italian patents, the British, Australian, New Zealand, Indian, South African, French, United States and other patent indexes, journals and reports, was open to the public during the usual office hours. The number of patent agents and readers who made use of the library was again greater than the previous year. Three hundred and eighty-five volumes of patent specifications and patent journals were added during the year, bringing the total number now available to the office and public to approximately 12,185.

STAFF

The number of officers, clerks and employees of the office averaged one hundred during the year and consisted of ninety permanent and ten temporary employees. This is an increase of three to the permanent staff.

LETTERS, ETC.

Letters and correspondence received by the office totalled 71,385, an increase of 1,721 over last year. The number of letters, correspondence forms and parcels of publications despatched was 151,095, an increase of 8,479 over last year. The total increase in the number of letters received and despatched amounted to 10,200, or nearly 5 per cent more than the previous year.

REGISTER OF PATENT AGENTS

Under section 57 of the Patent Act requiring the registration of all persons entitled to represent applicants in the presentation and prosecution of applications for patents or in other business before the Patent Office, 215 names of patent agents were added to the register. The total number of agents on the register at the close of the year was 2,395.

PREPARATION OF APPLICATIONS BY AGENTS

The improvement in the preparation of applications noted in last year's report has continued this year. Agents have exercised greater care in conforming to the requirements of the Patent Act and Rules and fewer errors and omissions have been made. This has reduced the work of the staff engaged in checking over the applications to see that formal requirements have been met and has resulted in a reduction of the number of applications on file awaiting correction before assignment to the examining divisions.

RESTORATION AND REVIVAL OF PATENTS

Six petitions for the restoration and revival of nine patents that had lapsed through failure to pay the renewal fees were presented under section 47 of the Patent Act. Of these applications four were made under authority of Acts of Parliament authorizing the commissioner to receive and hear the petitions.

Five petitions affecting six patents were awaiting hearings under this section from the preceding year. During the year eleven hearings were held, resulting in the granting of orders of restoration of fifteen patents.

FORFEITURES, RESTORATIONS AND REINSTATEMENTS

Nine hundred and sixty-three applications were forfeited through failure to pay the issue fee within the time prescribed after allowance. Upon payment of the restoration and issue fees prescribed by section 43 of the Patent Act one hundred and eighty-seven forfeited applications were restored. One of these restorations was made under an Act of Parliament authorizing the Commissioner of Patents to accept the fees and restore the application. There were also twenty-six reinstatements of applications that had lapsed through failure to complete and prosecute within the time limit defined by rule 10 of the Rules, Regulations and Forms.

PETITIONS RESPECTING MANUFACTURE AND IMPORTATION

At the beginning of the year there were two petitions involving eleven patents before the office for licence to manufacture under section 40, and one for the revocation of two patents under section 41, of the Patent Act. Three petitions against ten patents were lodged during the year under section 40 and one affecting one patent under section 41. Under section 40 one petition affecting one patent was refused, one involving ten patents was withdrawn and three involving ten patents were pending at the close of the year. Of the two petitions under section 41 one affecting two patents was abandoned and one affecting one patent is still pending.

PETITIONS RESPECTING FOOD AND MEDICINE

Under section 17 of the Patent Act an application for the grant of a licence for the use of an invention for the production of medicine was made but before any action was taken it was withdrawn by the petitioners.

TREND OF INVENTION

The increased activity in invention which has been manifested during the past few years was still more marked in the fiscal year 1929-30. With few exceptions the activity has been distributed over the whole field of invention.

In the chemical and allied arts the use of cellulose derivatives in the production of artificial threads and fibres and their treatment for the making of fancy products, the production of synthetic resins for various uses and the manufacture of synthetic drugs and dyes have been the subject of an increased number of applications.

The increasing use of electrical power for industrial and domestic purposes has resulted in a large number of applications for generation, transmission and control apparatus. In connection with talking picture machines many improvements have been made in the use of photo-electric cells, and in the construction of thermionic valves for radio and other uses there is a marked increase in the number of applications. Submarine cable applications for the elimination of distortion of signals have materially increased. Automatic telephones and television apparatus have formed the subject of many applications particularly by specialists connected with large organizations. Electric, gas and vapour discharge lamps for general lighting, advertising signs and for use in the production of ultra-violet radiations have greatly developed.

Applications relating to transportation such as road, railway and aeronautical vehicles, brakes, clutches, couplings and propellers showed a good general increase.

In inventions of machinery for the mechanical keeping of accounts and compilation of statistics and of calculating and cash register machines there has been considerable activity.

LEGISLATION

Five Acts of Parliament for the relief of the owners of five patents were passed. Four of these granted the right to apply under section 47 of the Patent Act for the restoration and revival of four patents that had become void for the non-payment of the renewal fees. The other Act permitted the payment of the final or issue fee on an application that had become forfeited and the time limit for its restoration under section 43 of the Patent Act had expired.

Respectfully submitted,

THOS. L. RICHARD,
Commissioner of Patents.

OTTAWA, September 1, 1930.

Appendix—Calendar of G Series, Part I.....	1

OTTAWA, March 5, 1931.

The Honourable,
The Secretary of State,
Ottawa.

SIR,—I have the honour to present to you the report of the Public Archives for the year 1930.

The Department has been requested to take over the custody of about one million files from the Department of National Defence. More than half of these records is classified and available. They are at present stored in the Daly Building. There is also a mass of material from the same Department in another building, which will be examined and classified whenever accommodation and a staff are provided.

In response to many demands a calendar has been prepared of a section of manuscripts technically known as the G Series, the first part of which forms an appendix to this report. The G Series contains instructions and correspondence addressed by successive Secretaries of State for the Colonies to the Governors and Lieutenant-Governors of Lower and Upper Canada, after the reunion of these provinces in 1841, to the Governors-General of the Province of Canada. The section here dealt with covers the period commencing four years before the division of the old Province of Quebec into the provinces of Lower and Upper Canada, and ending with their reunion.

Here may be followed, step by step, the several stages in the development of the ideas and policy of the Home Government, under the stress of the struggle of the House of Assembly of Lower Canada from the state of tutelage in which the Legislature began, on their way to complete self-government. For the sake of a clearer understanding of the views and intentions of the chiefs of the Colonial Office, all the more important despatches have been printed in full. There is in course of preparation, a calendar for the corresponding period for Upper Canada.

The Archives received as a gift from the Right Reverend The Lord Bishop of Ottawa, a large water-colour drawing of Ottawa which apparently came from the home of Colonel By, the founder of the Capital.

A very fine water-colour sketch about eight feet in length showing the river front at Quebec for about eight miles was presented by Mr. Langton of Toronto.

You will observe in the report of the Index Division that the demands for information outside of the city amounted to over eleven hundred. Many of these inquiries involved considerable research and taxed to the utmost the resources of the department.

The reports of the several divisions of the Archives will show what has been accomplished.

I have the honour to be, Sir,

Your obedient servant,

A. G. DOUGHTY,
Deputy Minister.

CLASSIFICATION, INDEX AND INFORMATION DIVISION

CLASSIFICATION

The classification of the correspondence of the Department of Customs, covering the years 1846-1867, is now complete. This correspondence fills 282 portfolios. That of the old documents relating to the Canadian Militia is being continued diligently.

The files and documents of the Canadian Expeditionary force transferred to this Department by the Department of National Defence and arranged, number approximately

400,000 overseas other ranks files.

41,000 overseas officers' files.

35,000 overseas subject files.

Personal correspondence files of deceased officers of the Great War are still in course of transfer by the Department of National Defence.

They are contained in

630 four drawer high cabinets.

74 four drawer square cabinets.

1,376 single drawer transfer sections.

8 eighteen drawer sections.

132 four drawer wooden cabinets.

The space occupied by these cabinets measures 80 feet by 75; they are in the southwest corner of the basement of the Daly Building, the whole of this material is arranged so as to be readily used.

The following additional records have been procured from the War Office, London:—

Complete lists of the Voyageurs of the Canadian boatmen of the Nile Expedition, 1884-5.

Lists of the 104th Regiment while in Canada, and lists of Strathcona Horse during the Boer War.

INFORMATION

The number of requests for information is still increasing. Since my last report, 1,106 inquiries have been received and attended to with gratifying results as witness the large number of letters received thanking the Department. A number of them deal with the War of the American Revolution and the Loyalists; the War of 1812-15; the Rebellion of 1837; the Fenian raids of 1865 and 1870; the rising of the Red River, 1870; the North-West Rebellion of 1885 and the Boer War, 1899-1901.

Officers of many regiments of the Militia are now engaged in writing the history of their corps and information is sought and obtained from the Archives.

Old age pensions still cause much research.

Many requests for data for biographies, genealogies and local histories have been successfully attended to.

INDEX

34,800 index cards have been typewritten, sorted and placed in their respective drawers:—

The Quebec Gazette (up to 1810 inclusive).....18,000 cards

Acadian genealogy 16,800

C. Series: 12 volumes have been indexed by students during the summer months.

They are:—

Pay rolls of the Loyalist Regiments during the War of the

American Revolution 31,408 cards

Records of Holy Trinity and St. Andrews Churches, Quebec,

3 volumes 11,635 cards

MAP DIVISION

The Map Division comprises more than thirty thousand loose maps dating from the Juan de la Cosa Map of 1500, and more than three hundred atlases including editions of Hexham, Blaeu, Sanson, Moll, deLisle and others. The maps are classified geographically, arranged in trays of four standard sizes, catalogued and indexed under the subject, the district and the name of the maker. A similar catalogue and index of maps and plans in atlases are now being made.

There are also many rare and interesting maps in the printed books in the Archives Library. A list of these maps has been prepared and is now available for the use of students and others carrying on research work in the Department.

RESEARCHES

The researches increase in number each year. The more general use of maps in the study and writing of history has increased the demands for access to the maps and for information on historical subjects. During 1930 eighty-two professors, lawyers, engineers and students consulted maps in the Map Division and received photostat copies of one hundred and sixty-two maps and plans.

In addition to this branch of research work, two hundred and seven requests for information were referred to the Map Division. These inquiries came from every section of Canada and many from the United States, the British Isles, and France. The subjects upon which information was requested included French forts and posts in the Maritime Provinces and Quebec, the boundaries between Ontario and Quebec and Ontario and Manitoba, the early settlements in Ontario, ownership of water lots and the areas of Ordnance Lands at Prescott and Niagara.

ACCESSIONS

One hundred and sixty-seven items were added to the collection during the year. The map of the World "exhibiting all the new discoveries up to the present time. Performed under the direction of Captain James Cook, in the years, 1768-1780" and published by A. Arrowsmith, and the Map of North America by John Mitchell 1755 in two sections in the original board cover are of special interest.

HISTORICAL RESEARCH AND PUBLICITY DIVISION

January 1, 1929 to December 31, 1930

I. RESEARCH

Two hundred and thirty-six special investigations were made by the Division, in the interest of the Federal and Provincial Governments, public and private institutions, and individuals. Work has been continued on the preparation of aids for future research.

II. PUBLICATIONS

Work is progressing in preparation for several future publications.

III. PAINTING, DRAWINGS AND PRINTS

Pictures received—942.

Volumes received (collections and catalogues of pictures)—20.

Pictures catalogued—9,989.

Approximately 35,000 pictures have now been catalogued. Much work has been done in the classification and indexing of the catalogue slips. Catalogue slips have been made for all items of Canadian interest in the *Canadian Illustrated News* and *L'Opinion Publique*, which have much value for the illustration of the life and public interests of Canada between the years 1869 and 1883.

IV. PHOTOSTATS AND PHOTOGRAPHS

Photostat negatives prepared and indexed—377.

Photograph negatives prepared and indexed—686.

Some 2,073 photographic and photostatic prints of material in the Public Archives were supplied by the Division.

V. LANTERN SLIDES

Lantern slides prepared and indexed—318.

There are now 745 lantern slides (of which 210 are duplicates) available for the illustration of lectures on Canadian history. The policy of loaning these slides to responsible teachers and lecturers has been continued, and the interest in their use is increasing.

APPENDIX A

Calendar of State Papers, addressed by the Secretaries
of State for the Colonies to the Governors General
or Officers administering the Province of
Lower Canada, from 1787 until 1841.

(Series G of Public Archives.)

INTRODUCTION

The volumes here calendared are the first of the series containing the despatches and other correspondence addressed from the Colonial Office to the governors and administrators of the provinces of Upper and Lower Canada. This series is the complement of series Q. which comprises the same class of correspondence addressed by the Governors and administrators to the Colonial Secretaries or other officers of the Colonial Office.

Owing to faulty classification, the earlier correspondence from the Colonial Office is far from complete, many despatches being found in the Q. series until about 1810. There are, also, a number relating to defence and the conduct of war, which were filed at the time of their receipt with the Military papers, which are in the C. series of the Public Archives. Finally, there were a few important despatches properly belonging to the G. series, which never reached the Government offices in this country, being addressed to governors at the time of their appointment before they left England. This is notably the case with Lord Durham who remained in England for some months after his appointment. Fortunately, these were all preserved by Lord Durham, whose papers were presented to the Public Archives, and were calendared in the Annual Report for 1923.

STATE PAPERS

LOWER CANADA, 1787-1841

G. 1. (1787-1805)

Sydney to Governor of Quebec. (Circular). Transmitting printed copy of a treaty of Navigation and Commerce between Great Britain and France, signed at Versailles, Sept. 26, 1786. (Enclosure), p. 1 **1786**
Whitehall Nov. 17.

Nepean to Governor of Quebec. (Circular). Transmitting printed copy of convention between Great Britain and France, supplementing the treaty of Sept. 26, 1786, signed at Versailles, Jan. 15, 1787. (Enclosure.) p. 50 **1787**
Whitehall Feb. 7.

Sydney to Dorchester. Request that enquiry be made as to best means of encouraging growth of hemp and its transportation to Great Britain. p. 61 **Whitehall**
March 15

Sydney to Dorchester. Acknowledging despatches Nos. 1 to 9 and expressing satisfaction with Dorchester's reception in Quebec, and the confidence of His Majesty in him. Critical situation as regards Indians; desirability of keeping on good terms with them in view of danger of Americans moving against treaty posts. Presents should be distributed among them, including ammunition for their defence against Americans. Major General Campbell returning to England, and Colonel Carleton being appointed brigadier general on American staff. Same rank for Colonel Ogilvie who will proceed with 4th Regiment of Foot to Nova Scotia to relieve 1st Battalion of 60th Regiment. Lieutenant Governor Patterson of Prince Edward Island who refused to obey orders to return to England to answer certain charges, has been dismissed and replaced by Colonel Fanning. Hamilton who was to have supplied the place of Lieut. Gov. Des Barres while the latter was answering charges against him in England is appointed lieut. gov. of Bermuda; Lieut. Col. McCormick will replace him to Cape Breton. Dorchester's suppression of unnecessary charges on Quebec establishment commended, but appearance of harshness must be avoided—Cumberland, Pollock, Bishop and Roberts not to be disturbed; Sinclair to remain on staff so long as forces are held at Michilimackinac; if Sir Thomas Mills does not perform duties of Receiver General, Dorchester should appoint a man at half Mill's salary; difference of opinion between Chief Justice (Smith) and inferior judges as to intent and meaning of clause in Quebec Act, relating to decision in certain controversies, before Law Officers. p. 62 **Whitehall**
April 5.

Sydney to Dorchester. Transmitting copy of "Act for the better examining and auditing of the Public Accounts of this Kingdom," and requiring strict attention to certain clauses; also, an act for continuing laws regulating trade between British Colonies and United States. Special attention directed to check on trade between British and Foreign islands in West Indies, and to relaxation in case of distress. p. 72 **Whitehall**

Sydney to Governor of Quebec. Enclosing three acts relating to America. p. 99

Enclosures:—

(1) An Act to continue several laws, relating to the free importation of certain raw hides and skins from Ireland and the British plantations in America; to the allowing of the exportation of certain quantities of wheat and other articles to H. M.'s sugar colonies in America; to the prohibiting the exportation of tools and utensils made use of in the Iron and Steel manufactures of this Kingdom; and to prevent the seducing of artificers and workmen employed in those manufactures to go into parts beyond the seas; and to the granting a bounty on the exportation of certain species of British and Irish linens exported, and taking off the duties on foreign raw linen yarns made of flax imported. (27 Geo. III, cap. 36). p. 100

(2) An act to enforce and render more effectual several acts passed in the twelfth year of the reign of King Charles II, and other acts made for the increase and encouragement of Shipping and Navigation. (27 Geo. III cap. 19). p. 104

(3) An Act for making further provisions in regard to such vessels as are particularly described in the act made in the 24th year of the reign of his present Majesty, for the more effectual prevention of smuggling in this Kingdom—; for taking off the duties on flasks in which wine or oil is imported; for laying an additional duty on Foreign Geneva imported; for taking off the duty on ebony the growth of Africa, imported into this Kingdom; and for amending several laws relative to the Revenue of Customs. p. 114

Whitehall
Sept. 14.

Sydney to Dorchester. Acknowledging despatches from 10 to 26 inclusive. Regarding the Posts, forming subject of No. 10, the Government were satisfied their retention was justifiable; steps should be taken to put them into temporary state of defence. Conduct to be observed towards Indians; they should be treated liberally, in view of possible American attempts on posts. Militia should be formed, partly as means of attaching principal French Canadians. Procuring seamen for service on the Lakes. Report of intention on part of United States to apply for sovereign of House of Hanover, instructions to Dorchester thereon. Disputes in province on laws and form of government deplored; no immediate change of constitution contemplated; severe censure awaiting persons found at fault in hearing of accusations of Attorney General (Monk) against Judges.

Expediency of remitting fine imposed on Franchère for censure of Montreal grand jury. Agreement with Dorchester's views as to alteration in tenure of grants of Crown lands; instructions to be issued on this subject as well as with regard to relinquishment of revenues from lands in Nova Scotia and New Brunswick. Cultivation of hemp to be encouraged. No further aids of provisions to be given to new settlers; their religious concerns will be attended to. The ordinance for the erection of Court Houses and Prisons under consideration; also, question of increasing responsibility of sheriffs. No separate treaty with Vermont to be sanctioned. Question of commercial intercourse by way of Lake Champlain. No arrangements admissible, allowing importation of foreign European manufactures or spirits of any foreign country, or exportation of peltries into United States. Secretary at War sending superintending medical officer. Proposals for mail service approved. Packet boat service to Halifax will be maintained as far as means permit. 1787
p. 134

Enclosure:—

Sept. 20.
p. 157

(1) Opinion of Attorney General Arden and Solicitor General Macdonald upon Chief Justice Smith's contention that under the Quebec Act when the parties to a suit were old British the laws of England should be the rule in the Courts; and that when the parties were French, the old French law should be invoked. The opinion rather against view of Chief Justice, but reference to Privy Council suggested. p. 158

(2) Chief Justice Smith to Nepean. Outline of argument in favour of his contention. Quebec,
Jan. 2.
p. 160

Sydney to Dorchester. Acknowledging despatches Nos. 27 to 38. King's gratification at reception of Prince William Henry. Proposal of Levi Allen to furnish masts, etc., for navy rejected. Concurrence with Dorchester's opinion that Americans have no fishing rights in St. Lawrence; commendation of Captain Coffin's conduct; instructions to be sent to Dorchester on subject. Decision will be given in due course on authority permitting Gregory & Co. to import foreign spirits into Nova Scotia. Regret for replacing Mr. Wood as Clerk of Crown and Clerk of Supreme Court of Nova Scotia by Mr. Thompson, hopes for opportunity to indemnify Mr. Wood for loss of offices. Arrival of transports with troops relieved in Quebec. No further instructions regarding Indians in relation to Americans appear necessary. Governor's proposals respecting Hugh Finlay and Post Office accepted by Postmaster General. Question of Land Tenures were then under consideration. Whitehall,
Nov. 8.

Castlereagh to Craig. No. 9. Acknowledging despatches Nos. 1 to 5, and Nos. 7 to 14, inclusive. No communication was sent while Canadian ports were shut as it seemed inadvisable to send any through United States. Conciliating conduct of Great Britain as contrasted with that of France lessening chances of war. For that reason, despatch of war material suspended. Craig's recommendations of pensions for widows of late Lieutenant Governor Le Maistre of Gaspé and Judge Davidson not favorably received owing to large emoluments enjoyed by those officers, but reasonable grants of land may be made to the ladies. Case of Mr. Martin transmitted to Admiralty. Trust that lease of St. Maurice Forges is not being completed. Willing to acquit President Dunn of improper motives. p. 48

Castlereagh to Craig. No. 18. Acknowledging despatches Nos. 31 to 46. Respecting No. 32, Sewell has been appointed Chief Justice and Uniacke, now proceeding to Canada, Attorney General. As to Perreault for Advocate General, that is not in department of Colonial Secretary. Explanation given in No. 35 as to complaints of Indians appeared satisfactory. Pleasure at learning lease for St. Maurice Forges not completed; every legal means should be employed to set it aside. Regret at unsatisfactory report on culture of hemp; request to persevere. Satisfaction with Craig's report No. 37 on handling of complaints of Montreal merchants. As recommended in No. 39 Dunn will be permitted to retire from judgeship with pension of £500 a year, reversion of half the amount to his widow in case of his death. As to disposition of ungranted lands in settled and divided townships (Crown and Clergy Reserves) dealt with in No. 41, Government policy was to take advantage of increase of settlement to augment value 1809

- 1809 of these lands. While not permitting grants Government sanctioned sales at certain rates. Craig's conclusion that as no sales had taken place, the regulation had failed, not justified, as not time enough yet to be sure of effect. Report from Craig desired. These lands should be leased on quit rents, at first low but afterwards increasing. Intention of Parliament to legislate against sale of liquor to Indians not yet known; if any measure proposed, consideration to be given to suggestions in No. 43. Regret to refuse petition of Mrs. La Bruère for continuation of pension to her late husband. Reasons given.

section of 24 Geo. II cap. 51, requiring certificates on entry of Pot and Pearl ashes from British colonies; by 49 Geo. III, cap. 47, permitting entry to certain British colonies of fruit, wine, oil, etc., from parts of Europe south of Cape Finisterre. Treaty with United States of 1794 having expired, with exception of ten permanent articles, the trade of that country is now on same footing with that of other nations. The late act of Congress for non-intercourse with British possessions does away with permanent articles of that treaty. For encouragement of trade with Bermudas, sugar and rum, exported from the West Indies to Bermudas, will enjoy same rates in Lower Canada as if exported directly from West Indies. Exclusion of United States fish from West Indies inexpedient at moment as there is no certainty that British colonies could meet requirements of West Indies. Order in Council of April 12 fixes duties on staves and fish imported into West Indies from United States. Further propositions for encouragement of Canadian merchants will be duly considered. p. 260

Regret at proceedings of Lower Canada Assembly as calculated to excite disunion and paralyze war operations. Disapproval of accusations against judges relating to Rules of Practice established by them and which attribute to advice of Sewell and Monk such acts of Craig as Assembly consider improper and illegal. "H.M.'s Government can never admit so novel and inconvenient a principle as that of allowing the Governor of a Colony to be divested of his responsibility for the Acts done under his Administration or permit him to shield himself under the advice of any persons however respectable either from their character or their office." Objections made in despatch No. 58 to making grants

out of Crown Reserves to Glengarry Fencibles and Canadian Voltigeurs withdrawn, in view of strong case made by Prevost. Grants to be made to officers and men of Meuron's and Watteville's regiments on frontiers of Lower Canada. The conduct of Grenadier Company of Watteville's regiment entitled them to special consideration. At conclusion of war, wives and families of soldiers to be sent out. Prevost's testimony to services of Commissary General Robinson in despatches No. 159 conveyed to Treasury. p. 43

Bathurst to Prevost. No. 79. (Copy.) Proposal to extend land grants to be given to Meurons and Watteville's regiments to regular troops. A certain proportion of each regiment with preference to those having families to be notified that, if desirous of settling in Canada, grants in desirable situations will be made to them. They should be placed in frontier sections for defence purposes. Grants should be comparatively small, to ensure against population being scattered. Speculation to be guarded against, by restrictions on grants. Work of dividing territories to be allotted should be begun without delay. Families desiring to emigrate from European countries might be induced to settle, as experiment. Provision for rations and implements to be at first free, and afterwards at low price. Report on proposition called for, with sketches of district selected. p. 47

Prevost to Bathurst. (Extract.) Opinion expressed that while quantity of land to be granted to settlers should vary with quality, 100 acres should be minimum and, as encouragement to industry, larger quantities should be held in prospect. Free and common socage tenure and patents free. Precautions against speculation. Provisions should be allowed for at least 12 months. Help should be given settlers in first stages. To provide for distribution of supplies, a commissioned officer of the Commissariat should be appointed, who would desire to become a settler. p. 59

Bathurst to Drummond. Owing to change in affairs in Europe emigration to Canada will be on much smaller scale than provided for; those conveyed at expence of Government will not exceed from 100 to 150 families; with those paying own expense, there may be 300 families altogether. Despatch received from Prevost (No. 235 of March 18, 1815) made clear the advantages of settlement on St. Francis over any in Townships more contiguous to Boundary Line. Instructions to proceed on line begun by Prevost. Supply of provisions to settlers left in hands of Administrator. Preference expressed for distribution at low price instead of gratuitously. To avoid evils of separation of settlers, they should be assisted in erecting huts together in some central spot as nearly equidistant as possible from the grant of each settler. Grants to settlers from United Kingdom to be made on similar terms to those to disbanded soldiers, with security against speculation and lands lying uncultivated. Bathurst to Sherbrooke. Calling attention to necessity for rigid economy in public affairs. Governor best able to determine where reductions of expenditure are possible. The heavy charges entailed by grants of land to retired soldiers and to emigrants from Great Britain should be largely over. Proposed settlers made to understand that they were not to expect any assistance (except perhaps a few agricultural implements) beyond what they could pay for. This rule to be strictly enforced by Governor. Another heavy item of expenditure is the maintenance of Indians. Instructions on this head are contained in despatch of June 19. Every effort must be made to impress on people of Province need for economy, in order to relieve burden on Mother Country. p. 126

Bathurst to Sherbrooke. (Confidential.) On line of conduct to be pursued towards Assembly, when its proceedings are open to objection. His despatch of May 31 will show that he is utterly opposed to exercise of prerogative when other means can be found to counteract factious and irregular courses. The reason for his instruction to Drummond was the belief that it would be possible in time of peace to defray the expenses of Civil Government from permanent revenues. Agreement with Sherbrooke that there are no grounds for expecting improvement in Assembly from general election. Sherbrooke left to exercise of his own discretion as to prorogation or dissolution. Bathurst to Sherbrooke. (Confidential). Referring to despatch of Sept. 23, enquiring whether in approving of bill for granting salary to Speaker of Assembly it was intended to establish a principle. Dec. 7.

Bathurst to Sherbrooke. (Private and confidential). Referring to private and confidential letter of Oct. 10 on the civil and political state of province. Sherbrooke mentioned difficulties due to incompatibility of instructions. On one hand he should conciliate Catholic clergy and people; on other, he should support Chief Justice Sewell. In choosing line, honor demands support of meritorious public servant, especially as he has been acquitted of charges made by Assembly. If Sewell were sacrificed, popular aversion would likely be transferred to some other individual. Articles of Impeachment were not supported

by representatives of Assembly because Assembly had been dissolved; moreover, as they related to Rules of Court they could be and were set forth in articles and did not require support. If, however, further charges are made against Sewell, there would be no difficulty about their being heard before Privy Council, with deputation from Assembly to present them. The remedies suggested by Sherbrooke are three: (1) the removal of Sewell; (2) appointment of agent under authority of Legislature; (3) detachment of James Stuart from party he leads. Sewell could not be removed, but if he should retire voluntarily and proper provision made by Legislature for retiring allowance, that would be satisfactory. As to agent, there would be no objection to an agent appointed by both branches of Legislature, but agent of Assembly alone would be inadmissible. Propriety of attempt to detach Stuart from popular party is discussed. Would he give whole hearted support to measures of Government in case he were made Attorney General, or would he use position to further ends of party he had ostensibly abandoned? No offer could be made to him until it was absolutely certain that he would be prepared to accept it. Matter left in Sherbrooke's hands. Suggestion that growing wealth and importance of province might make desirable an increased Civil establishment. If Assembly would find funds, the Government would accept their recommendations of qualified persons for the appointments. p. 178

As to his emoluments, they were calculated, everything considered, upon what they were when Canada was ceded to Great Britain in 1763. The Bishop appears to have fallen into error, which has survived from that year, when it was necessary to explain that the practice of Roman Catholic religion could be permitted no farther than the laws of England permitted. Under those laws all measures tending towards establishing Popish Hierarchy must be adopted with much circumspection, and it was only by very favorable construction of the spirit of the laws that authority was given to recognize Dr. du Plessis as Roman Catholic Bishop of Quebec. It was only on the evidence of his zeal and loyalty that he was appointed to seat in Legislative Council. It must be understood that this distinction will not follow as matter of course, but must depend on circumstances and the experience of the benefits that will arise from appointment. p. 151

Bathurst to Sherbrooke. No. 158. Referring to secret and confidential despatch of Jan. 10 setting forth difficulties and objections to course prescribed for trial of impeachment charges against Judge Foucher. As an alternative, it is suggested that Assembly draw up charges, supported by such documentary evidence as deemed proper to sustain charges; that charges and evidence be submitted to Judge Foucher, whose defence should be turned over to Assembly for rejoinder, and the whole transmitted to England for adjudication of Prince Regent in Council. Care should be taken that no new charges be introduced into Assembly's rejoinder. This course not quite free from objection, but the objection would be probably less than expense and inconvenience attending hearing of parties before Privy Council. If, however, Assembly would prefer latter mode, and will provide for expenses of all parties, that would be sanctioned. No members whose presence might be desired by Assembly, would be required to appear, unless they were quite willing. Downing St.,

- 1818 individuals above 21 years of age, and can command sum equal to £20 for each such individual. Grants will be made at rate of 100 acres for each person carried out, with assurance of further grant when satisfactory progress is made on first. Every person receiving grant must advance in England half the capital he professes to have at disposal for this purpose in order to its being repaid to him in colony on his location upon land allotted. The advantages will be settlement in communities, and the capital will be properly employed to ensure due cultivation of land and comfortable settlement of people. Government must however render assistance at first and Treasury is requested to decide whether it should be in shape of free passage, or rations to persons settled, for limited period. p. 45

Bathurst to Richmond. No. 4. Acknowledging despatch No. 200 enclosing report of Special Committee of Assembly on Civil List for 1818. Three subjects in report require consideration: salaries of absentees; pensions; and sinecure offices. As regards absentees, he concurs fully in views of Assembly, as will be seen from 54 Geo. III, c. 61, introduced to Parliament by him. This act precludes appointment thereafter of officers to colony except during period of their residence therein; consequently the inconvenience due to absenteeism will not be of long duration, and probably Assembly would not wish to make more immediate provision than appeared expedient for Parliament to enforce. The Auditor of Land Patents mentioned in report is about to return to duty. As respects Pensions, he is assured Assembly would not be unwilling to defray expenses incurred for remuneration of persons who have rendered service to province, or for relief of indigent persons who in all countries have claim on public benevolence. Charges of this sort expire with lives of grantees, and it will be for Assembly to decide on future cases. Respecting sinecure offices, which may be abolished, the holders might be transferred to Pension List. Would Assembly not consider it advisable to confine abolition, to those offices to which no duties are attached, and to consider the other sinecurists in light of absentees and left to operation of 54 Geo. III, or place them on Pension List, and leave offices to be filled by residents or efficient public servants? The residence of Lieut. Governor of Gaspé could not but be highly advantageous; as also, the office of Inspector of Police at Montreal, though apparently now ineffective. As regards Provincial Agent, there would be greatest objection to their nominating an agent, as inconsistent with duties of House, whose control is properly exercised through the powers they have over his salary. The objection would still subsist, though in lesser degree, to nomination by both houses, but would be waived if whole Legislature insisted on nomination. In such case, the Governor would have to use great discretion in approving of individual designated, and, also, to see that present agent was not injured by action of Legislature. Approval expressed of Sherbrooke's observation that allowance for clergy, whether Protestant or Roman, should not be paid from province funds. p. 85

- Enclosure:—
Minute of Council dealing with memorial of Quebec and Montreal merchants. Regret is expressed that disputes in Legislature over measures threaten to restore to operation the old ordinance passed before 31 Geo. III, cap. 31. Failure of discussions between British and United States plenipotentiaries to lead to satisfactory conclusion. Turning to Provincial Act of 1817, it is pointed out that restriction of importation of United States flour for consumption was intended to benefit Canadian agriculture alone. Restrictions on importation of fresh and salted provision were in interest not of Canada only but of British fisheries and provision trade of Ireland. If Canadians desire to import flour for consumption, no objection would be made, but the objection still remains regarding salted provisions. Times of scarcity could be guarded against by empowering Governor to authorize admission of these articles during such period. Treasury concurs with memorialists as to expediency of, if not excluding, imposing high duties on articles manufactured in United States, specified in list accompanying memorial. Whether they could

1819 be excluded would depend on efficiency of Custom Houses, on which Treasury has no information. Temporary act should be passed in conformity with these principles, and draft of permanent act prepared in Canada for submission to Imperial Parliament. p. 138

April 11. Bathurst to Dalhousie. (Private and confidential.) Thanking him for communication of Jan. 18, stating that he proposed to retain Col. Ready as Civil Secretary. Regret that for reasons given the Cape Breton business could not be settled within Dalhousie's term. Difficulties arising from death of King made necessary a new commission to Dalhousie. Hopes that departure will not be delayed. Word of warning about Canadian jealousy of Nova Scotia. Only question of importance pending relates to resumption of Sulpician Estates by Crown. Opinion of Law Officers delayed owing to internal disturbances. If, as he hopes, that opinion is favourable to resumption, question arises whether tacit relinquishment of right for long period makes it politic to resume it. Importance of having Civil List independent of Legislature; resumption of Estates would bring that within reach. That this course would lessen Roman Catholic influence is minor consideration. Hopes that some sort of compromise may be possible. Chief Justice and English Church Bishop will not be

inclined towards compromise. Views and prejudices of former must lessen influence of his opinions. Bishop man of considerable abilities and stirring disposition; hope expressed that Dalhousie's communications with bishop may be pleasanter than his own have been. 1820
